- Radial Master Cylinder AEROTEC®
- 6 piston Caliper AEROTEC®
- Disc AERONAL Stainless Steel

## KITS for TMAX Yamaha

Type of TMAX	designation	Part n°	Retail price
500 TMAX 1 caliper 2001-2003	Brake Master cylinders right+left <b>BRO12+CRO12</b> built-in reservoir caliper 6 pistons AEROTEC® with pads <b>Y11A</b> Disc AERONAL floating STAINLESS STEEL <b>Y17L-G</b> and <b>HOSE</b>	<b>RTMAX1</b>	1251.68
500 TMAX 2 calipers 2004-2007	Brake Master cylinders right+left <b>BRO14+CRO12</b> built-in reservoir calipers 6 pistons AEROTEC® with pads <b>Y13A+Y03A</b> Discs AERONAL floating STAINLESS STEEL <b>Y17L-G+Y17L-D</b> and <b>HOSE</b>	<b>RTMAX2</b>	1838.63
500 TMAX 2 calipers 2008-2009	Brake Master cylinders right+left <b>BRO14+CRO12</b> built-in reservoir calipers 6 pistons AEROTEC® with pads <b>Y11A+Y01A</b> Discs AERONAL floating STAINLESS STEEL <b>Y17L-G+Y17L-D</b> and <b>HOSE</b>	<b>RTMAX3</b>	1838.63

- 7 colors: black, blue, gold, silver, purple, titanium, red
- 2 types of levers and mirror holders available
- Repair kits for all the parts

## Braking systems for Yamaha TMAX

### Give to your TMAX the best brakes:

- Improve the power of your brakes with BERINGER radial AEROTEC® master cylinder
- ♦ Reduce your braking distance with a pair of high performance aluminium CNC machined AEROTEC® calipers
- ♦ Improve the time life of your braking with the AERONAL floating discs: aluminium hub and stainless steel CNC machined rotor.

These **BERINGER® brake and hydraulic clutch MASTER CYLINDERS** were developed for Supermoto, Enduro, Moto-Cross, Sport bikes. They are very compact and very light (from 10oz). Fully machined from billet using a three ball bearings system and covered by the AEROTEC® world-wide patents, they bring an exceptional feeling.

**CALIPERS BERINGER®:** BERINGER® calipers are CNC machined from billet and are designed to mount directly on the forks, without adapter plates. The AEROTEC® patent of guiding the pads brings an exceptional feeling. The caliper is delivered with BERINGER® sintered metal pads.

**STAINLESS STEEL AERONAL FLOATING DISCS:** aluminium hub and plain stainless steel CNC machined rotor ensure no distortion and bring a constant braking in all conditions. Thanks to the exclusive offset system binding the hub and the braking surface which spreads to loads to the supporting areas, the constraint at this very place is divided by two, and the working life of the disc increases.
