

BERINGER AERO's commitment to sustainable development

Respect for the Environment

- At BERINGER, toxic substances and non recyclable materials are eliminated from the fabrication process
- A specialized sorting process for trash is implemented in the workshop
- An environmental awareness campaign is organized.

Reduction of Energy Consumption

- A bioclimatic building (BBC) made of local wood only consumes 17kw/h/m²/yr. .
- 98% of the energy used to heat water is solar-powered Les véhicules de BERINGER fonctionnent au GPL: •BERINGER vehicles function using GPL; they have reduced CO2 emissions and no particle emissions..

Eco-Designs for Products

- They are innovative in design and implementation: 9 patents are currently registered.
- There is absolutely no toxic products used in the fabrication process.
- They are designed to have an unlimited shelf life because pieces that are worn down can be replaced.
- They are 99% recycable
- 98% of the products are made in France within a radius of 400km; this process reduces transportation and energizes local industrial bases.

Respect for Human Dignity in the Workplace

- From one end of the assembly line to another, from in-house to subcontractors, BERINGER staff members work in optimal conditions following the regulations of OIT (International Work Organization).
- There are neither low-cost suppliers nor outsourcing.

Respect for the Ethics of Economics

- BERINGER partners (suppliers, subcontractors, banks, clients) are chosen based on ethical criteria, not the lowest price
- BERINGER commits to projects based on their moral philosophy :
 - BERINGER wheels are not involved in projects that could intentionally threaten human life.
 - BERINGER has partnerships concerning eco-friendly projects (Green challenge, SolarImpulse).

Zero Compromise on Quality

At BERINGER, quality is not only respect for procedures that the EASA certifies, such as the Design Approval Organization and the Production Approval Organization (Part 21G), Quality is a pledge of trust to our clients: when buying a BERINGER product, our clients entrust us with their lives. To prove responsible and worthy of this trust, we offer a lifetime warranty « civil responsibility » for all of our products

BERINGER AERO integrates its partners in its projects, from the design stage to commercialization

- AeroProviders
- PEGASE
- Hautes Alpes Développement

In 2010 and 2011-2012, the MADE IN RESPECT label recognized BERINGER AERO's commitment to sustainable development

On February 24 BERINGER AERO won the Trophée RSE PACA TPE 2012.
