

BUSH WHEEL 26" ULM/LSA

diameter 620mm

Fly to where your dreams are ...

NEW

diameter 620mm

Thanks to their incredible 620mm diameter and very low pressure (0,6 bar), the new BUSH WHEELS will allow you to approach landings across water, to land on riverbeds, and on soft or rough terrain. They offer you a new di-

mension of freedom.

The BUSH WHEEL includes the famous BERINGER 2-piston brake, fully capable of delivering all the torque required by the large-diameter tyre. You will be able to stop your aircraft within meters and still be able to hold against full power with the brakes.

TUBELESS

Diameter: 26"

Dimension: 620mm x 230mm

Weight: wheel with brake (caliper, pads, disc) + tyre : 12.8kg

TUBELESS

Price of the tyre only: **399.70€** retail without tax

BUSH WHEEL 22" ULM/LSA

Diameter 540mm

Rough terrain ?... Yes

NEW
diameter 540mm

*With a 540mm diameter and low pressure (0,8 bar), the **BERINGER 22" BUSH WHEEL** is able to handle soft or rough terrain, expanding your landing possibilities.*

With a 9.3kg weight (wheel+brake+tyre), the 540mm assembly is 3.5kg lighter than the 620mm wheel above. It reduces weight and cost while maintaining high performance bush capability.

Diameter: 22"
Dimension: 540mm x 200mm
Weight: wheel with brake
(caliper, pads, disc) + tyre :
9.3kg
