

Wall Panels

Inspired by traditional French woodwork, our wall panels offer unmatched advantages in terms of ease of installation and design personnalisaion. Our woodwork combine the traditional spirit, nobility of materials and modern solutions such as backlighting.

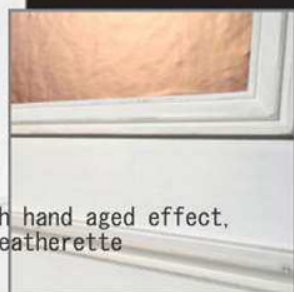

White paint with hand aged effect, agned effect, leatherette

Concrete and iron nail heads

Croco and platinum

White hand paint and gold

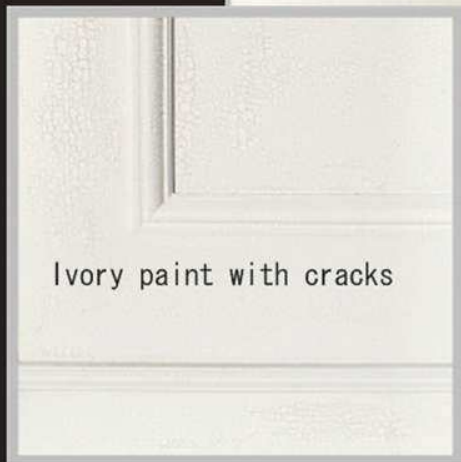

Linen and Sylver

Red leatherette bubbles, massive wenge and composite resine panels with backlight

Wenge panel, backlight in sticks, massive white oak cornice

Ivory paint with cracks

Graphite paint with frosted effect and backlit panels

In our workshop

- Our woodwork inspired by the great French tradition has been revisited by contemporary artists. Here are some benefits and technical specifications.
- The panels are machined from a material resistant to temperature changes and moisture. We offer optionally panels suitable for wet rooms and lightweight panels to facilitate handling. Depending on the needs thickness of the material can range from 9 to 30 mm.
- The dimensions are variable and our manufacturing and fixing process enable to cover large surfaces.

- Followign actory finishes are proposed : hand paint, laquer, natural wood veneer, leather, fabric, metal, concrete ...

- Cornices and skirting boards can be machined in massive wood varnished or painted.

- Jointing of panels is made with a recessed joint or using a metal profile

- Moreover, our hidden fasteners make installation and removal easy. The panels are separated by only one centimeter of the support which allows electrical connexions.

- The backlight is possible in the central rods and the panels made from the mineral resin. It is activated using a remote control and can vary the intensity, color, flash rate Our system allows replacement of electrical components when needed.

- Advantages:
- Customization of dimensions and finishes at infinity
- Assembly and disassembly quick and easy requiring no special expertise
- Resistant materials and suitable for use in public places and private
- Use in all types of rooms including damp rooms and places to frequent change
- Supplied flat
